## **EQUIPMENT MOUNTING**

IT IS VERY SIMPLE TO INSTALL VALUE ADDED COMPONENTS TO THE INTERIOR OF RM'S FIBREGLASS BUILDINGS. THE INTERNAL STRUCTURAL FLANGES PROVIDE A CONVENIENT PLACE TO FASTEN OR MOUNT ELECTRICAL BOXES OR CABLE CLIPS FOR WIRING

Components such as heaters, lights and surface mounted utility boxes can be either glued or screwed to the interior surface of the insulated fiberglass panels.

Cable clips and conduits can be mounted to the interior surface of the insulated panels as well as the interior flanges of the parts.

Holes can easily be cut to mount thru wall equipment such as exhaust fans and a/c units.

Panels can be re-enforced to hold the weight of larger hvac systems that may be required.

The interior of the unit can be fitted with a wide variety of options to suit almost any need
